HYDROLINK: Primary-Secondary Piping Gateway

AUTOFILL / BACKFLOW

AIR - DIRT SEPARATORS

Z1 - ZONE VALVES

MIXING VALVES

We have new hydronic solutions

www.caleffi.us

Like our Hydrolink. Designed for today's low mass boilers, Hydrolink is a complete primary-secondary piping package that combines a low loss header with isolated secondary circuits in one easy-to-install unit.

Result: Guaranteed flow through the boiler to prevent flashing or boiler hot spots, and minimum Delta P drop between each secondary circuit to assure accurate flow.

Contact us and ask about the Hydrolink and other innovative products engineered for today's hydronics.
