

HARNESSING ENERGY IS NOT ENOUGH. REGULATION MAKES THE DIFFERENCE.

COMPONENTS FOR SOLAR SYSTEMS - CALEFFI SOLAR

www.caleffi.com

The Caleffi Solar series of products are specifically designed for use in circuits of solar systems. In these systems the heating fluid may contain glycol as additive and may operate at high temperatures. The materials and components used in its manufacture and the performance of these must be suitable for these operating conditions.

- Automatic air vents
- Safety relief valves
- Deaerators
- Thermostatic mixing valves
- Circulation unit
